IT

Il verde significa **rinascita e reincarnazione**. Come colore del legno giovane **rappresenta la crescita primaverile**. Il verde è associato alla natura, all'aria aperta e agli alberi che donano ossigeno. **E' il colore della conoscenza e dell'illuminazione il quale ci consente di lasciare la nostra mente libera di viaggiare e di rilassarsi**, in ragione di ciò il verde potrebbe essere **particolarmente indicato per la stanza da letto**, il luogo in cui per antonomasia regna il relax e per dare una nuova veste alle porte che ci consentono di accedere ad un'altra realtà. Ovviamente bisogna fare attenzione all'intensità del colore, **le tinte molto scure** sono assai più impegnative delle tinte tenui.

*Ruft Erkenntnis und
Erleuchtung hervor*

DE

Grün bedeutet **Wiedergeburt, Reinkarnation**. Wie die Farbe des Holzes **steht Grün für das frühlingshafte Wachstum**. Grün wird mit der Natur, mit der frischen Luft und den Bäumen, die uns neuen Sauerstoff schenken, in Verbindung gebracht. **Es ist die Farbe der Erkenntnis und der Erleuchtung, die es uns ermöglicht, unseren Geist frei reisen zu lassen und sich zu entspannen**; daher könnte Grün **besonders für das Schlafzimmer gut geeignet sein**, der Ort der puren Entspannung, um den Geist auf neue Ideen zu bringen, die uns den Zugang zu einer anderen Wirklichkeit ermöglichen. Natürlich muss die Farbtintensität beachtet werden, wobei **die zarten Töne den sehr dunklen vorzuziehen sind**, da diese sehr kräftig und mächtig wirken können.

*It recalls knowledge
and inspiration*

EN

Green signifies **rebirth, reincarnation**. As the colour of the young wood, green **represents springtime growth**. Green is associated with nature, the outdoors and the trees that provide oxygen. **The colour of knowledge and illumination that leaves our minds free to wander and relax**, green could be **particularly indicated for the bedroom**, the place of relaxation par excellence, and to give a new look to the doors that lead us into another reality. Obviously, care has to be taken with the intensity of the colour. **Darker shades are considerably more demanding than delicat**es.

la luminosidad*

ES

El verde significa **renacimiento, reencarnación**. Como color de la madera verde, **representa el crecimiento primaveral**. El verde se asocia a la naturaleza, al aire libre y a los árboles que dan oxígeno. **Es el color del conocimiento y la iluminación que nos permite dejar nuestra mente libre de viajar y relajarse**, y por eso el verde **podría ser especialmente indicado para el dormitorio**, el lugar por excelencia donde reina la relajación, y para dar un nuevo aspecto a las puertas que nos permiten acceder a otra realidad. Por supuesto, debemos prestar atención a la intensidad del color, **prefiriendo los colores suaves a los muy oscuros** que son mucho más arduos.

I colori dei disegni presenti sul catalogo cartaceo, sito internet, application e qualsiasi altro
 supporto potrebbero non corrispondere al reale punto di colore del tessuto, si consiglia
 quindi di procedere alla scelta utilizzando il campionario tessile.
 Design colours shown in the paper catalogue, on the internet site, on the application and in
 any other support media may not correspond with the real shade of the fabric; therefore it is
 recommended to select from the textile pattern book.

Die Farben der Dessins im Katalog, auf application, im Internet oder in anderen Abbildungen
 können vom wirklichen Farbbild des Gewebes abweichen, so dass wir Ihnen empfehlen, bei Ihrer
 Stoffauswahl eine Stoffkollektion zu verwenden.
 Los colores de los dibujos que se encuentran en el catálogo impreso, en la application, por internet
 y en cualquier otro soporte, podrían no corresponder al tono real del color del tejido. Se aconseja,
 por lo tanto, la elección de dicho colorido utilizando siempre nuestro muestrario textil.
